

Fitness Buddy Knowledge Base

This document serves as the knowledge base for the AI Fitness Buddy agent built using IBM watsonx Orchestrate.

1. Beginner Workout Plan

Warm-up: 5–10 minutes walking or light jogging. Monday: Full body (Squats 3x10, Push-ups 3x8, Plank 3x30s). Tuesday: 30 minutes brisk walk. Wednesday: Upper body (Incline push-ups, Shoulder taps, Dumbbell rows if available). Thursday: Stretching + Yoga 20 minutes. Friday: Lower body (Lunges, Glute bridges, Calf raises). Saturday: Light cardio 30 minutes. Sunday: Rest.

2. Weight Loss Tips

Maintain a calorie deficit, eat more vegetables and protein, avoid sugary drinks, sleep 7–9 hours, and walk at least 8,000 steps daily.

3. Muscle Gain Tips

Consume enough protein (1.2–1.8 g/kg/day), progressive overload, strength training 3–5 days/week, adequate sleep and hydration.

4. Healthy Eating

Each meal should include lean protein, whole grains, vegetables, healthy fats, and fruits.

5. Hydration

Drink 2–3 liters of water daily; increase intake during exercise or hot weather.

6. Recovery

Take at least one rest day each week. Stretch after workouts and sleep well.

7. Safety

Stop exercise if you experience chest pain, dizziness, or severe discomfort. Consult a healthcare professional before beginning a new exercise program if you have medical conditions.

8. FAQ

Q: Best exercise for beginners? A: Walking, bodyweight squats, push-ups, planks, and stretching.

Q: How many days should I work out? A: Beginners: 3–4 days/week. Intermediate: 4–5 days/week.

Q: Can I lose weight without a gym? A: Yes. Walking, running, cycling, and bodyweight exercises are effective.
